master s thesis from the year 2021 in the subject business economics market research grade 10 accadis hochschule bad homburg language english abstract mobile payment systems are an innovation that allows people to make contactless payments with a mobile device such as a smartphone at the cash register in brick and mortar retail outlets without carrying a wallet with credit and debit cards while other countries have almost entirely adopted and integrated this innovation into their daily lives adoption rates in germany remain significantly low hence the objective of this work is to analyze the future of mobile payment systems in germany with respect to the reasons for adoption or refusal in particular the following research question was addressed will mobile payment methods replace physical cards in germany or will certain factors prevent full adoption

presents managers with models for success via explicit examples of management innovation this book provides context with examples of key business innovations

as recently as the summer of 2001 many travelers were dreading air transportation because of extensive delays associated with undercapacity of the system that all changed on 9 11 and demand for air transportation has not yet returned to peak levels most u s airlines continue to struggle for survival and some have filed for bankruptcy the situation makes it difficult to argue that strong action is urgently needed to avert a crisis of

undercapacity in the air transportation system this report assesses the visions and goals for u s civil aviation and technology goals for the year 2050

this volume comprises the papers and debates of the second france ilo symposium on the future of work employment and social protection reflecting the aim of the symposium itself the book provides in depth reflections on work employment and social protection designed to be more than an account of the discussions this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets particularly in the developed world the book discusses the need for more family friendly policies and a more radical policy of equality between the sexes the legal dimensions of labour market change are also debated and the book explores the positive and negative sides of globalization and its links with technological change

a fascinating look at the cutting edge science and technologies that are on the cusp of changing everything from where we ll live how we ll look and who we ll be by the popular science broadcaster and bestselling author jay ingram where will we live how will we get around what will we look like these are just some of the questions bestselling author and popular science broadcaster jay ingram answers in this exciting examination of the science and technologies that will affect every aspect of human life in these pages ingram explores the future of our technological civilization he reports on cutting edge research in organ and limb regeneration advances in prosthetics the merging of the human and the synthetic and gene editing vertical farming and lab grown food might help feed millions and alleviate pressure on the planet cities could accommodate green space and the long awaited flying car finally he speculates on the future of artificial general intelligence even artificial superintelligence as well as our place on earth and in the universe the potential impact of these developments in science and technology will be powerful and wide ranging complicated by ethics and social equity and they will inevitably revolutionize every aspect of life and even who we are this is the future of us

featuring contributions from an international array of futurists the future starts now provides fascinating insights and guidance into how society and business will transform in the years to come the future is an uncertain uncomfortable prospect for employees employers and society at large a flurry of unprecedented events have proven that despite what some politicians and economists may tell us the future is not set in stone instead it is constantly being shaped and redefined by the everyday decisions of individuals and organizations in light of this uncertainty the future starts now looks toward the various innovations and technologies that may shape our future authors theo priestley and bronwyn williams have brought together the world s leading futurists to articulate and clarify the current trajectories in technology economics politics and business this is a comprehensive history of tomorrow with guidance insight and predictions that are fascinating for those curious about what the future may hold as well as business professionals looking to steer their career or their organization with foresight and confidence

the future of business explores how the commercial world is being transformed by the complex interplay between social economic and political shifts disruptive ideas bold strategies and breakthroughs in science and technology over 60 contributors from 21 countries explore how the business landscape will be reshaped by factors as diverse as the modification of the human brain and body 3d printing alternative energy sources the reinvention of government new business models artificial intelligence blockchain technology and the potential emergence of the star trek economy

hurricane katrina the internet stock bubble disease outbreaks are these predictable

preventable events or are we merely the playthings of chaos a compelling irreverent elegantly written history of our future that addresses the most important issues of our time apollo s arrow examines such questions as how well can we predict the future can past discoveries help us understand tomorrow s weather patterns or tell us what our financial future will look like will scientists ever be able to forecast catastrophes or will we always be at the mercy of mother nature waiting for the next storm epidemic or economic crash to thunder through our lives david orrell looks back to show us how past scientists and some charlatans predicted the future and where we are on the path to truly understanding what comes next he asks how today s scientists can claim to predict future climate events when even three day forecasts prove a serious challenge can we predict and control epidemics can we accurately foresee our financial future or will we only find out about tomorrow when tomorrow arrives

thinking about the future is essential for almost all organizations and societies states corporations universities cities ngos and individuals believe they cannot miss the future but what exactly is the future it remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown the future is rarely a simple extrapolation from the present in this important book john urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future this includes examining the methods used to model the future from those of the rand corporation to imagined future worlds in philosophy literature art film tv and computer games he shows that futures are often contested and saturated with different interests especially in relation to future generations he also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future the future seems to be characterized by wicked problems there are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake urry explores these issues through case studies of 3d printing and the future of manufacturing mobilities in the city and the futures of energy and climate change
